JOINT ATOMIC ENERGY INTELLIGENCE COMMITTEE

22 JAN 1974

MEMORANDUM FOR: Deputy to the DCI for National Intelligence Officers

SUBJECT: Priority Needs of Nuclear Intelligence Consumers

1. For the past several weeks the Joint Atomic Energy Intelligence Committee of the USIB has been receiving briefings by non-intelligence agencies on anticipated needs for nuclear energy intelligence. The conclusions and impressions gleaned from such presentations will form the basis for the revision of the National Requirements for Technical Information on Foreign Intelligence Activities (USIB-D-32.14/2 of 23 September 1968).

2. The JAEIC thus far has heard from the Arms Control and Disarmament Agency and the Atomic Energy Commission. Briefings by the Joint Staff, Strategic Air Command, AF Weapons Laboratory, the Joint Strategic Targeting and Planning Staff, and the Department of State are planned.

3. At the meeting on 15 January 1974, the Committee asked that all National Intelligence Officers be advised of its need for insight into the type and quality of nuclear intelligence required to support US policy decisions during the next five years and that they be invited to identify individual or agency users of such intelligence so that they may be invited to assist the Committee.

4. We would appreciate your informing all NIO's and encouraging their assistance.
